

### Abstract of the Disclosure

An automatic software component creating system includes a software component definition data storage section which stores software component definition data therein, a software component creation rule storage section which stores software component creation rules therein, and a client program creation rule storage section which stores client program creation rules therein. A software component creating section creates a software component module with one or more software components based on the software component definition data and the software component creation rules in response to a start instruction. A client program creating section creates a client program source code based on the software component definition data, the software component module, and the client program creation rules, when the software component module is created.
